BOIL WATER ORDER LIFTED FOR WARNER SPRINGS UNIFIED SCHOOL

Test Results Show No Bacteria Present in Drinking Water Supply

The County of San Diego, Department of Environmental Health (DEH) has lifted a Boil Water Order for the Warner Springs Unified School, effective immediately. A water sample collected on July 11 confirmed the presence of total coliform bacteria in the water supply for the Warner Springs Unified School. *E. Coli* bacteria was **absent** in the sample. Total coliform bacteria can come from soils and other sources in the environment, and can indicate a problem with the water supply system. The Boil Water Order was issued to the school to ensure all water used by the school is free from contamination.

The water system was disinfected and flushed under the guidance of Certified Operator. Five follow-up samples are **absent** for total coliform bacteria. The Boil Water Order is hereby lifted.

For more information on the Boil Water Order, please call the Warner Springs Unified School at 760-782-3517.
